APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of Barber Creek, as heretofore appropriated under Proofs 01349 and 01350 as appears in the matter of the determination of the Relative Rights to Waters of Barber Creek and Its Tributaries, in the District Court of the First Judicial District of the State of Nevada, in and for the County of Douglas is issued subject to the terms, conditions and irrigation period imposed in said decree and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

A valve or other type of regulating device with a substantial measuring device must be installed at the applicants' point of diversion to ensure that the total quantity of water diverted is limited to the amount permitted.

A substantial measuring device must be placed above the uppermost diversion on Barber Creek. This measuring device must be approved by the State Engineer prior to installation and prior to any diversion of water.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0166 cubic feet per second, but not to exceed 6.0 acre-feet per season.

Work must be prosecuted with reasonable diligence and be completed on or before:

May 9, 2001

Proof of completion of work shall be filed before:

June 9, 2001

Water must be placed to beneficial use on or before:

May 9, 2003

Proof of the application of water to beneficial use shall be filed on or before:

June 9, 2003

Map in support of proof of beneficial use shall be filed on or before:

Question 15. Remarks:

This Application No. 64314 is changing the Place of Use and Point of Diversion for a total of 6 AFA, 3 AFA per parcel, of Barber Creek Decreed, deeded water from within the Crowell Ranch boundary to each of the noted parcels. Reference Payton/Crowell Deed, Document #19242, dated December 1, 1961.

A total of 70.26 decreed acres lie within the Crowell Ranch boundary, resulting in a total of 360.836 AFA with a duty of 5.136 AF/A.

6 AFA will be stripped from the existing 360.836 AFA thus leaving a total balance of 354.836 AFA resulting in a reduction of duty from 5.136 AF/A to 5.050 AF/A over the total 70.26 acres.

The reduction of the original duty from 5.436 AF/A to 5.136 AF/A is a result of filing Application No.s 64308, 64309, 64310, 64311, 64312 and 64313.

Note:

Sheridan Creek is currently under adjudication, the possibility exists that upon adjudication of rights in Sheridan Creek a portion of the acreage currently under Barber Creek Decree may also be covered by Sheridan Creek.
